

*First Call Trucking & Courier  
12 Channel Street, Suite 503  
Boston, MA 02210*

## First Call Trucking & Courier Are Your “GREEN” Truckers:

- We currently have one hybrid vehicle in our fleet, with the plan to add more in the future.
- We print all our documents on 30% post-consumer recycled paper.
- We are members of The Sustainable Business Leaders Program ([sustainablebusinessleader.org](http://sustainablebusinessleader.org)) and Boston’s Sustainability Business Network ([sbnboston.org](http://sbnboston.org)).
- We offer paper recycling as part of our services – we provide the bins and pickup and transfer your waste paper to a recycling plant, for low or no cost!
- We have teamed up with Boston College’s SIFE Program – an international organization that connects entrepreneurship with community service - and are actively researching alternative energy sources we can use to fuel our trucks.
- We regularly donate to TerraPass, an organization that funds projects that reduce CO2 emissions and balances out the emissions resulting from our shipments. Each year, the average truck emits about 400,000 lbs. (about 4lbs. per mile) in carbon dioxide - a leading cause of global warming. When you choose to offset the carbon emissions of your shipment by picking an environmentally friendly carrier, like First Call, TerraPass will fund projects that reduce carbon dioxide emissions somewhere else.
- We recycle nearly EVERYTHING in our office.
